This level is meant to provide basic pharmaceutical sciences knowledge, skills and appropriate attitudes to students. All modules are fundamental and are intended to build students' knowledge and skills necessary for acquiring competences appropriate for modern practice of pharmacy; instill motivation for life-long learning and good foundation for progress studies in pharmacy profession.

ASSESSMENT

Assessment is an integral part of the learning process and must support and complement the learning strategies in order to achieve the required outcomes. Assessment in particular, must reflect the required progression and be sensitive to the range of key skills developed.

Principles of Assessment

- i. Assessment will reflect aims and objectives of the overall scheme and learning outcomes of the module.
- ii. Assessment will be designed to assist students' learning, particularly, their development as self-directed learners and the acquisition of key skills.
- iii. Assessment will be varied to facilitate motivation and recognition of the need to adopt approaches which enable students to demonstrate and fulfill learning objectives.
- iv. Assessment will reflect progression through studying year, with increasingly more complex methods being associated with higher order skills.

Assessment Methods

The following assessment methods will be used:

Assignments

The object of assignments is to reinforce the learning process by involving the students in finding solution to a given question or problem which require decision- making. They include tasks given to students apart from written tests and examinations or projects, so as to enhance self- development. Individual or group assignments will be in form of written work and/or practical exercises. For each module appropriate assessment methods and instruments will be indicated. Facilitators will administer not less than two assignments for a given module in a semester.

Competence Tests

The intention of competence tests is to measure the practical capability of learners through actual doing of a particular task or skill. This will be conducted in actual or simulated environment.

Class Room Knowledge Tests

The intention of classroom tests is to measure theoretical and practical performance of students through evaluation of written work and actual doing respectively. There will be a minimum of two written classroom tests in each semester under supervision of qualified tutor (s). Duration of each test will be not less than two (2) hours.

End of Module Examination

This examination shall be conducted for duration of three (3) hours under supervision of qualified tutor(s).

Management of Assessment

The mode of conduct and administration of assessment shall be that approved by NACTE.

- NTA LEVEL: 5 This Programme has 11 modules, which are assigned 120 credits.

MODULE CODING

The system of coding has adopted a combination of letters and numbers, which have a specific meaning. For example, the following modules offered in the first semester by the department of Pharmaceutical Sciences may be coded respectively as PST 04101 where:

PST 04101: refers to Dispensing module.

PS Represents the first two letters of the department “Pharmaceutical Sciences”.

T Represent the qualification at the respective level “Technician”.

04 Represents the respective NTA Level.

1 Indicates the semester in which the module is conducted

01 Represents the serial number to which a particular module is assigned in the department (in this case 1st Module).

GRADING SYSTEM Marks will be awarded out of 100 percent. The marks so obtained from different assessment Components will be graded as follows:

S/N	SCORE RANGE	GRADE	DEFINITION
1	80 – 100	A	Excellent
